

МИНИСТЕРСТВО ОБРАЗОВАНИЯ И НАУКИ РОССИЙСКОЙ ФЕДЕРАЦИИ
МОСКОВСКИЙ АВИАЦИОННЫЙ ИНСТИТУТ
(НАЦИОНАЛЬНЫЙ ИССЛЕДОВАТЕЛЬСКИЙ УНИВЕРСИТЕТ)

ЛАБОРАТОРНАЯ РАБОТА №1

по курсу “Объектно-ориентированное программирование”

I семестр, 2021/22 учебный год

Студент: Рожков Илья Алексеевич, группа М8О-207Б-20

Преподаватель: Дорохов Евгений Павлович, каф. 806

Задание:

Разработать программу на языке C++ согласно варианту задания. Программа на C++ должна собираться с помощью системы сборки CMake. Программа должна получать данные из стандартного ввода и выводить данные в стандартный вывод.

Вариант №21:

Комплексные Числа

Дневник отладки:

Проблем не было.

Вывод:

При выполнении работы я на практике познакомился с CMake и классами, перегрузил операторы и выложил всё на гитхаб. Очень удобные технологии.

Исходный код:

CMakeLists.txt

```
cmake_minimum_required(VERSION 3.20)
project(oop_exercise_01)

set(CMAKE_CXX_STANDARD 23)

add_executable(oop_exercise_01 main.cpp Complex.cpp Complex.h)
```

Complex.cpp

```
//
// Created by Илья Рожков on 28.11.2021.
//

#include "Complex.h"
#include <cmath>
